

Die vorliegende Lösung ergibt durch Farbaustausch und Multiplikation des Endwertes mit -1 die gesuchte Bewertung, d.h. Ergebnis: 7/16.

$$\{-2 \mid -\frac{1}{2}\} = -1$$

$$\{\{-1, -2 \mid -\frac{1}{4}, 0\}, \{-1, -\frac{3}{2} \mid -\frac{1}{2}, 0\} \mid -\frac{1}{4}, 0\} = \{-\frac{1}{2}, -\frac{3}{4} \mid -\frac{1}{4}\} = -\frac{3}{8}$$

$$\{-\frac{1}{2}, -\frac{7}{4}, \{-1, -\frac{7}{4} \mid -\frac{3}{4}, -\frac{1}{2}, 0\} \mid -\frac{3}{8}, -\frac{1}{4}, 0\} = \{-\frac{1}{2} \mid -\frac{3}{8}\} = -\frac{7}{16}$$
